SUMMARY

Junior Frontend Developer focused on building clean, responsive React applications. Strong foundation in JavaScript, component-based architecture, and REST API integration. Motivated to contribute to real-world frontend projects and grow within a professional team.

SKILLS

Frontend Technologies — JavaScript (ES6+), TypeScript, React.js, Next.js.

State & Data — React Query, Redux Toolkit, Zustand (basic).

Styling & UI — Tailwind CSS, CSS, Responsive Design, Figma, Webflow.

Animations — Framer Motion, GSAP, Lenis.

Tools & Workflow — Git & GitHub, npm / yarn, Postman, Chrome DevTools, VS Code.

PROJECTS

Gallery – Art Marketplace Platform | Personal Project [🔗](#)

React, TypeScript, React Router, Tailwind CSS

- Built a responsive frontend application focused on reusable components and clean UI structure.
- Implemented authentication-related UI flows and API integration.
- Designed dashboards and user-facing pages with emphasis on maintainable component architecture.
- Improved performance using lazy loading and optimized component rendering.

Professional Experience

Junior Frontend Developer – Independent Projects & Learning

2024 – Present

- Built multiple frontend applications using React and TypeScript.
- Translated UI designs into responsive, user-friendly interfaces.
- Practiced clean code principles and component-based development.
- Integrated REST APIs and handled application state effectively.

EDUCATION

Faculty of Commerce, Sadat University, Bachelor's Degree in Business Administration

LANGUAGES

Arabic — Native/Bilingual

English — Conversational
