## SUMMARY

Junior Frontend Developer focused on building clean, responsive React applications. Strong foundation in JavaScript, component-based architecture, and REST API integration. Focused on writing maintainable UI code and improving frontend skills through real-world projects.

## SKILLS

**Frontend Technologies** — JavaScript (ES6+),TypeScript, React.js.

**State & Data** — React Query, Redux Toolkit, Zustand (basic).

**Styling & UI** — Tailwind CSS, CSS, Responsive Design, Framer Motion, GSAP.

**Tools & Workflow** — Git & GitHub, npm / yarn, Postman, Chrome DevTools, VS Code.

**Design Tools** — Figma, Webflow.

## PROJECTS

### Ammar Yasser Optics Store Platform ⬀
*Next.js, TypeScript, Tailwind CSS, Supabase, GSAP*
- Built a real-world optics store platform for selling medical and sunglasses with a modern, responsive UI.
- Implemented virtual try-on experience per product and color to enhance user interaction and confidence before purchase.
- Developed full e-commerce flows including authentication, cart, orders, repairs requests, and doctor-based discounts.
- Integrated Supabase for authentication, database, storage, and role-based access using RLS.

### Gallery – Art Marketplace Platform ⬀
*React, TypeScript, React Router, Tailwind CSS*
- Built a responsive frontend application focused on reusable components and clean UI structure.
- Implemented authentication-related UI flows and API integration.
- Designed dashboards and user-facing pages with emphasis on maintainable component architecture.
- Improved performance using lazy loading and optimized component rendering.

### Crusto | Fast Pizza Delivery App ⬀
*React, CSS, JavaScript, Tailwind*
- Built a modern pizza ordering web application with a responsive and clean UI.
- Implemented real-time cart state management using Redux.
- Utilized Vite for fast development and optimized performance.

## Professional Experience

### Junior Frontend Developer – Independent Projects & Learning                        2024 – Present
- Built multiple frontend applications using React and TypeScript.
- Translated UI designs into responsive, user-friendly interfaces.
- Practiced clean code principles and component-based development.
- Integrated REST APIs and handled application state effectively.

## EDUCATION

**Faculty of Commerce, Sadat University, Bachelor's Degree in Business Administration**

## LANGUAGES

**Arabic** — Native/Bilingual                                        **English** — Conversational
